

*Holding Power Accountable*

To U.S. Senator Lisa Murkowski, U.S. Senator Dan Sullivan and US Representative Don Young,

Alaska needs to be a leader on HR1/S1, the For the People Act.

Secret money and corporate special interests should not determine the outcome of our American elections. Billionaires should not be able to buy and manipulate our Republic to bend to their economic whims.

Closing campaign finance loopholes:

- That currently allow interference by foreign nationals and governments in our elections are critical
- Financial election transparency currently blurr and conceal what special interests are funding various candidate and ballot measure campaigns. This needs to stop.

We the undersigned, as locally owned Alaska businesses and national corporations that do business in Alaska, and non-profit community-based organizations, recognize:

- That our election system is in need of serious overhaul
- Billionaires should not be able to buy and sell our elections
- Political transparency is a cornerstone to any healthy republic
- All eligible American citizens should have the freedom to vote without having barriers erected to prevent their voices from being heard
- Wealthy special interests have too strong of a grip on our elections, and we need to unlock the stranglehold that wealthy interests have on our American political system

Common-sense reforms in For the People Act are deeply popular across the political spectrum, have passed in many states and localities and aim to accomplish the following:

- Protecting and strengthening the sacred right to vote for all who are eligible
- Ending the dominance of secret money in politics; and
- Ending partisan and racial gerrymandering so voters can choose their elected officials instead of politicians cherry-picking their voters

We the undersigned support the premise that our U.S. Constitution is about upholding and expanding our rights, not taking our rights away. We the People need to make sure all who are eligible can exercise their right to vote without undue hardship. The For the People Act restores the fundamental premise that, at the ballot box, all voices are equal.

We the undersigned businesses and local Alaskan community-based non-profits are calling on Alaska's Congressional Delegation, U.S. Senator Lisa Murkowski, U.S. Senator Dan Sullivan and US Representative Don Young to champion and support the For The People Act.

Sincerely,
